SAFE-T

Suicide Assessment Five-step Evaluation and Triage

1

IDENTIFY RISK FACTORS

Note those that can be modified to reduce risk

2

IDENTIFY PROTECTIVE FACTORS

Note those that can be enhanced

3

CONDUCT SUICIDE INQUIRY

Suicidal thoughts, plans, behavior, and intent

4

DETERMINE RISK LEVEL/INTERVENTION

Determine risk. Choose appropriate intervention to address and reduce risk

5

DOCUMENT

Assessment of risk, rationale, intervention, and follow-up

Suicide assessments should be conducted at first contact, with any subsequent suicidal behavior, increased ideation, or pertinent clinical change; for inpatients, prior to increasing privileges and at discharge.

1. RISK FACTORS

- ✓ **Suicidal behavior:** history of prior suicide attempts, aborted suicide attempts, or self-injurious behavior
- ✓ **Current/past psychiatric disorders:** especially mood disorders, psychotic disorders, alcohol/substance abuse, ADHD, TBI, PTSD, Cluster B personality disorders, conduct disorders (antisocial behavior, aggression, impulsivity)
  Co-morbidity and *recent onset of illness increase risk*
- ✓ **Key symptoms:** anhedonia, impulsivity, hopelessness, anxiety/panic, global insomnia, command hallucinations
- ✓ **Family history:** of suicide, attempts, or Axis 1 psychiatric disorders requiring hospitalization
- ✓ **Precipitants/Stressors/Interpersonal:** triggering events leading to humiliation, shame, or despair (e.g, loss of relationship, financial or health status—real or anticipated). Ongoing medical illness (esp. CNS disorders, pain). Intoxication. Family turmoil/chaos. History of physical or sexual abuse. Social isolation
- ✓ **Change in treatment:** discharge from psychiatric hospital, provider or treatment change
- ✓ **Access to firearms**

2. PROTECTIVE FACTORS *Protective factors, even if present, may not counteract significant acute risk*

- ✓ **Internal:** ability to cope with stress, religious beliefs, frustration tolerance
- ✓ **External**: responsibility to children or beloved pets, positive therapeutic relationships, social supports

3. SUICIDE INQUIRY *Specific questioning about thoughts, plans, behaviors, intent*

- ✓ **Ideation:** frequency, intensity, duration—in last 48 hours, past month, and worst ever
- ✓ **Plan:** timing, location, lethality, availability, preparatory acts
- ✓ **Behaviors:** past attempts, aborted attempts, rehearsals (tying noose, loading gun) vs. non-suicidal self injurious actions
- ✓ **Intent:** extent to which the patient (1) expects to carry out the plan and (2) believes the plan/act to be lethal vs. self-injurious.
  Explore ambivalence: reasons to die vs. reasons to live

* *For Youths:* ask parent/guardian about evidence of suicidal thoughts, plans, or behaviors, and changes in mood, behaviors, or disposition

* *Homicide Inquiry:* when indicated, esp. in character disordered or paranoid males dealing with loss or humiliation. Inquire in four areas listed above

4. RISK LEVEL/INTERVENTION

- ✓ **Assessment of risk** level is based on clinical judgment, after completing steps 1–3
- ✓ **Reassess** as patient or environmental circumstances change

RISK LEVEL	RISK/PROTECTIVE FACTOR	SUICIDALITY	POSSIBLE INTERVENTIONS
High	Psychiatric diagnoses with severe symptoms or acute precipitating event; protective factors not relevant	Potentially lethal suicide attempt or persistent ideation with strong intent or suicide rehearsal	Admission generally indicated unless a significant change reduces risk. Suicide precautions
Moderate	Multiple risk factors, few protective factors	Suicidal ideation with plan, but no intent or behavior	Admission may be necessary depending on risk factors. Develop crisis plan. Give emergency/crisis numbers
Low	Modifiable risk factors, strong protective factors	Thoughts of death, no plan, intent, or behavior	Outpatient referral, symptom reduction. Give emergency/crisis numbers

(This chart is intended to represent a range of risk levels and interventions, not actual determinations.)

5. DOCUMENT

Risk level and rationale; treatment plan to address/reduce current risk (e.g., medication, setting, psychotherapy, E.C.T., contact with significant others, consultation); firearms instructions, if relevant; follow-up plan. For youths, treatment plan should include roles for parent/guardian.
